Environmental Design and Protection Committee: Neighboring homes are reasonably well screened by existing trees in the open space easement (OSE) but recommend additional screening and removal of a palm tree. Plans indicate grading and tree removal in OSE – recommend no grading be permitted and all fencing should be wildlife friendly. Committee also pointed out that the ADU needs a separate entrance, the average slope on the plans is incorrect, and that the hardscape is not defined on the site plan. The most recent revision to the plans addresses several of these issues and the recommended conditions of approval address the remainder.

Pathways Committee: Applicant should pay in-lieu fees prior to issuance of the building permit.

Open Space Committee: The Committee did not provide a comment letter. However, a large portion of the property is encumbered in an existing open space easement and no development is allowed in that easement. The existing gravel road (bridge not included) should be removed. No tree removal or grading is permitted and removal of invasive species from the riparian areas is recommended. No fencing is permitted in the easement and fencing on the perimeter of the easement shall be wildlife friendly.
